SINCE 1967

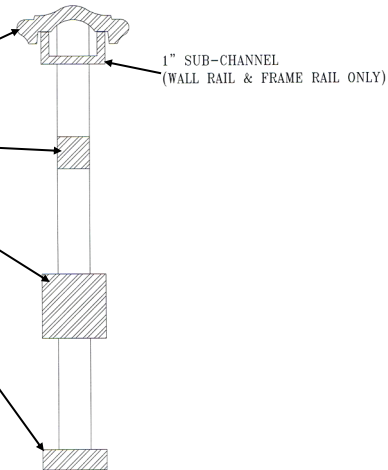

# Standard Railings

Every railing is custom built to the specifications of your project; insuring proper fit and equal picket spacing.

## Standard Materials:

- **1-3/4 inch Colonial Molded Handrail**
- **½ inch solid square Pickets**
- **1 inch solid square Posts**
- **1 x 5/16 solid rectangular Bottom Bar**

All material is carbon steel

**\*\*Height: Our Standard Residential is 36" @ landings - 34" @ stair** All rails are assumed res. unless otherwise noted

**Commercial is 42" @ landings - 36" @ stair**

Please check your local building code requirements for specification with regard to commercial & residential applications

## Finish-

- Standard, all iron railings are cleaned and finished electrostatically, with Metal Master Satin black paint.
- We offer custom colors and exotic finishes, such as Verdigris and other patinas.
- We also offer Powder Coating as an extra for our iron railings and, as a standard, for our Aluminum rails. Standard colors are Black, White, and Bronze. Please note: powder coating does not inshore a maintenance free product.

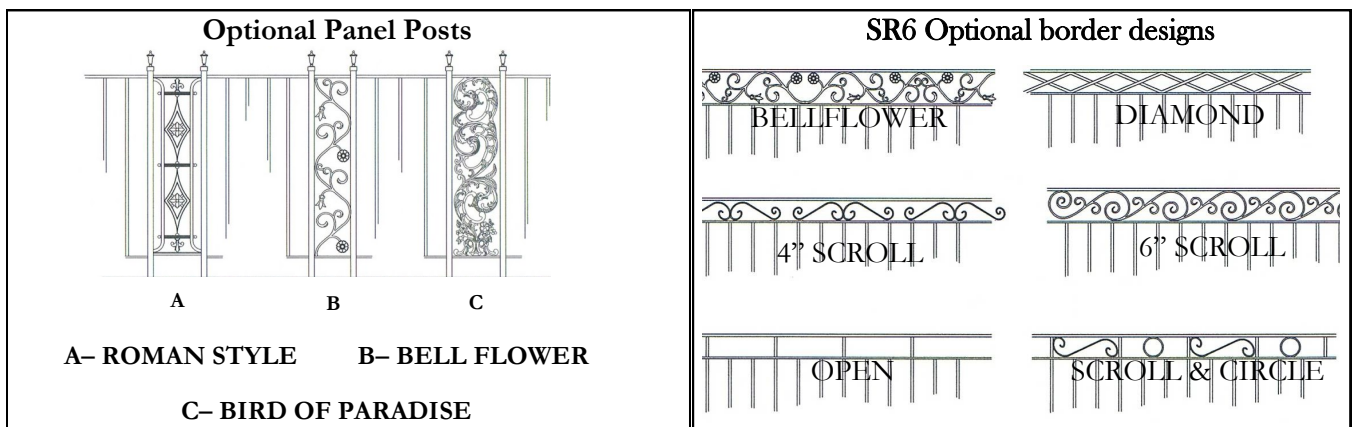

## Installation-

- Complete installation service is available.
- We also sell our products to Contractors for installing (with provided field dimensions).

## Warranty

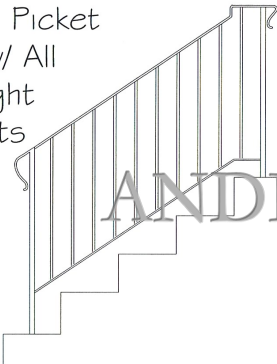

*1-year warranty on workmanship and materials.*

*This excludes the finish. Customers must be aware that wrought iron is low maintenance, not maintenance free. It is excepted that with the size and weight of our product touch up will be necessary.*

Please Note: This booklet has detailed information to help in the design of your ironwork. Most of our work is still customized, including curved sections, gates, fence, balconies, and many other custom projects. If you don't see what your are looking for please contact us for further assistance. Thank you!
